FLAVIA®
CREATION
400™
Brewer

Freshness & Choice

Taste and aroma... it's all in the brew

The unique FLAVIA FRESH RELEASE™ system serves delicious drinks brewed fresh every time.

The water unlocks the sealed freshpack, releasing the aromatic ingredients to brew directly into your cup, ensuring you only taste the beverage you choose.

Workplace Expertise & Sustainability

Keep your workplace running smoothly

Because the FLAVIA FRESH RELEASE system exists solely in the workplace this is where our expertise is focused.

In fact, tests¹ show that this unique system directly contributes to:

- Increased office interactions; 54% of employees experienced more interactions with colleagues
- Higher levels of engagement and satisfaction
- Improved productivity and morale

Technical Specification

Convenient reliability

- No clean-up, no mess, one cup at a time
- Drinks ready in 40-60 seconds
- Available 24/7
- Industry-leading reliability – FLAVIA CREATION 400 brewers go over a year and a half* between service calls

- LCD display with interactive software to guide the user when selecting drink categories and options
- Sleek and stylish design, yet small and compact in size
- Will complement any office space

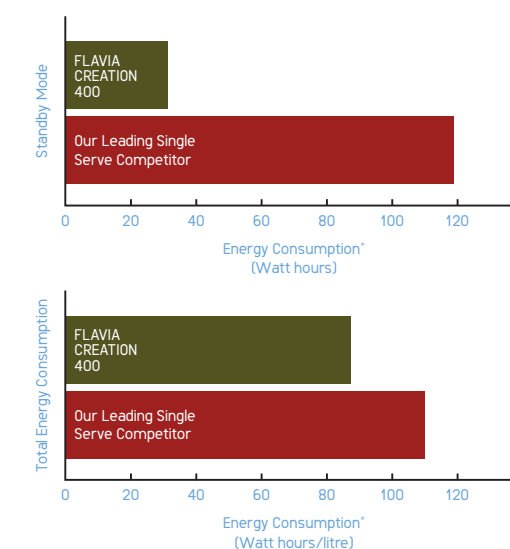

The choice of over 25 combinations

Make fantastic cappuccinos, lattes and mochas with our unique two pack technology, as well as espresso style drinks.

The FLAVIA CREATION 400 has been designed to be as energy efficient as possible.

- The FLAVIA CREATION 400 is more energy efficient than the leading single serve competitor. Tests revealed the leading competitor in single serve uses 26% more energy.
- The FLAVIA CREATION 400 has a standby mode to conserve energy, when in standby mode it outperforms all of the leading table-top freshbrew office coffee machines tested.

*Mars Drinks internal quality report (August 2010) shows on average over 80 weeks between breakdowns based on full service history of thousands of Creation 400 brewers.

¹Mars Drinks partnered with McKinsey & Company to execute a landmark study focusing on a select group of businesses in North America that were asked to introduce FLAVIA to their employees, and study the changes that the FLAVIA beverage system had on their workplaces.
*Average energy used per cup served based on 200 cups/week throughput.
